Projects

1. Glossfily Cosmetics E-commerce Website
Techs Stack: Django, Python, HTML, CSS

- Developed a fully-functional e-commerce platform for cosmetics products, ensuring a seamless user experience from product browsing to checkout. Implemented user authentication (signup/login/logout) for personalized shopping experience and order tracking.
- Integrated a shopping cart allowing users to add products and proceed to checkout. Built database models for managing products, customers, orders, and payments, ensuring data integrity.
- Applied responsive design principles using HTML and CSS to ensure compatibility across desktop devices. Used Django templates to render dynamic pages and manage views efficiently.

2. Expense Tracker App
Tech Stack: Django, Python

- Created an expense tracker application where users can add, view their expenses. Enabled user authentication for secure login and personalized experience.
- Integrated features such as authentication, categorized expenses, and visual data representation using charts. Ensured an intuitive and user-friendly interface with minimalistic design, making it easy for users to track finances.

3. Employee Management System
Tech Stack: Django, Python

- Developed a web application to manage employee records, enabling HR departments to efficiently handle employee information. Designed models to store personal details, job roles, salaries, and attendance records for each employee.
- Implemented CRUD functionalities for employee data management, including role-based access control for different user types (admin, HR).
